

TeamSystem Welfare Platform - Product Summary

Concept: AI-personalized employee welfare for corporate HR teams.

What this prototype demonstrates

- Personalized recommendations by POV (life stage, role, work mode, goals, family context).
- Explainable recommendation logic ("Because you...", fit scoring, context signals).
- Dual-sidebar enterprise shell: Client Portal -> nested Welfare application.
- Core operational surfaces: Dashboard, Marketplace, Wallet, Profile, Inbox, Requests, AI Assistant.

Key UX differentiators

- Family wallet allocation with interactive sliders and real-time remaining budget updates.
- Life-stage trigger nudges that refresh recommendations as employee context changes.
- Personalized marketplace sorting and eligibility labels per employee profile.
- Concierge-style Inbox + AI prompts tailored to each employee POV.

Design system and quality

- Cairo sans-serif typography, TeamSystem blue (#004080), semantic color roles, icon-led scanning.
- Radius system standardized to 4/8/12/16 with 8px for interactive controls.
- Accessibility-focused interaction patterns (focus-visible states, readable contrast, keyboard-friendly controls).

Routes included

/portal, /welfare/dashboard, /welfare/profile, /welfare/marketplace, /welfare/wallet,

/welfare/inbox, /welfare/ai, /welfare/requests, /welfare/transactions, /welfare/onboarding

Prototype status: High-fidelity functional prototype with fake data for HR stakeholder demos.
